

Disposing of Assets – ONLINE

Level: Intermediate

Description

Each year millions of dollars are spent on new plant, equipment and assets. At the same time, however, little thought is given to disposing of the old assets that are being replaced. Often these assets are put in a warehouse and storeroom, rather than disposed of. As a result, thousands of dollars are wasted and a pile of unwanted equipment just sits around cluttering up the office.

This course examines the policies and process regarding asset disposal.

Learning Outcomes

On completion of this course participants should be able to:

- Understand asset disposal and its role in procurement activity
- Describe types of assets and
- Describe ways to dispose of assets
- Considers effective assessment criteria;
- Discuss issues related to developing specification for different contract types; and
- Explain the structure and format of an Asset Disposal Plan

This course covers the requirements of the following unit of competency – PSPPCM002 – Dispose of Assets.
